

CoMobility - Newsletter 8

June 2022

- The CoMobility team, headed by the 'On-Site' Foundation, organised a big field game for students and teachers from the participating classes to conclude the first year of cooperation. The group consisted of 76 children and 22 adults. We came together to exchange impressions of a year of joint activities, learn from each other and celebrate the end of the first round of urban labs. You can find out more about the field game, the theme and some photos on → [our website](#).
- Pupils from Primary School No. 377 in Warsaw's Targówek District have created their nature reserve! You can read about which plants have been planted, their functions in the ecosystem and the nicknames given to them by the children on → [news](#) on the CoMobility website.
- On → [news page](#) of the University of Warsaw, you can read an article summarising a year of activities in the CoMobility project. You are cordially invited to read!
- In June, two very important meetings were held between the CoMobility team and experts from the Norwegian funds and NCBiR. The experts positively evaluated the implementation of the project, supporting the team with suggestions for further development. The CoMobility project was awarded as one of the best-implemented projects funded by the IdeaLab competition. The meetings were attended by representatives of the Applied Research Programme Committee, the Ministry of Funds and Regional Policy, the Royal Norwegian Embassy, the Research Council of Norway, the EEA and Norway, the National Centre for Research and Development and the City of Warsaw. On behalf of the UW, the meetings were attended by Prof. Zygmunt Lalak, UW Vice-Rector for Research, Prof. Gabriela Grotkowska, Dean of WNE UW, Prof. Małgorzata Grajper-Głowacka, Vice-Dean of the Faculty of Sociology of UW, and Prof. Katarzyna Śledziewska, Director of DELab UW.
- June was also intensive in research activities. Marcin Luckner from the PW CoMobility team presented the study 'Streaming Detection of Significant Delay Changes in Public Transport Systems' (conducted with Przemysław Wrona and Maciej Grzenda) at the International Conference on Computational Science (ICCS) 2022 in London. Magdalena Kubecka from the 'On-Site' Foundation spoke at the World Urban Forum in Katowice with a presentation on 'Streets for Children As A Tool for Creating Sustainable Cities.'

- Plans for July and August 2022:
 - Further analysis of the data collected in the first CoMobility quantitative survey
 - Intensive research work
 - Preparation of the second workshop for local authorities
 - Preparation of the September consortium meeting to be held in Oslo

*CoMobility benefits from EUR 2.05 million received from Iceland, Liechtenstein and Norway under the EEA funds.
The project aims to provide a package of tools and methods to co-create sustainable mobility in urban areas.*
